Anhydrous Ammonia
Paint

Number of Victims: 0

Types of Injuries Sustained: N/A

Injury Outcomes: N/A

Number of Events with Evacuations: 0

Number of People Evacuated: N/A

Interesting Events:

Individuals were attempting to steal from a nurse tank for the production of methamphetamine. As a result the valve on the nurse tank was left opened causing the release of 500 gallons of anhydrous ammonia. The nurse tank was in a warehouse shed and both liquid and vapors were in the shed upon arrival by local officials. The building was opened and vapors were blown out.

The driver of the truck swerved on the highway. When trying to correct, the truck overturned releasing an unknown amount of paint. Access to the road was restricted and a contractor was hired to perform the clean up
